

February 2010

The creation of working groups for Grand Vision implementation, including a Transportation Working Group convened by the Chamber, and the elevation of the Chamber's representative to Chair of TC-TALUS has allowed the Chamber to re-define the role of the Transportation Committee. The committee is now a small, core group appointed by the Chair of the Chamber Board of Directors that meets on a quarterly basis or as needed to address issues and requests. The committee focuses on transportation issues specifically related to the Chamber's mission of economic development, legislative advocacy, and programs and services, and will answer the questions of "What do we do?" "Who do we do it for?" and, "What is its value?"

Chair of this Transportation Committee is Evan Smith.
